

Microland Positioned as a Major Contender in Everest Group's PEAK Matrix™ for Solutions: IT Infrastructure Services Automation 2017

June 20, 2017: Microland, a leading global hybrid IT service provider, announced that it has been positioned as a "Major Contender" in Everest Group's PEAK Matrix™ for Solutions: IT Infrastructure Services Automation 2017.

As a part of this report, Everest Group analyzed 15 leading service providers on a combination of analyst assessment and feedback, collated from client interviews. The PEAK Matrix is a composite framework that provides an objective, data-driven, and comparative assessment of IT services automation providers based on their market success and delivery capability. Based on the analysis, Microland emerged as a Major Contender that exhibited deep domain expertise across technologies with a business outcome driven approach to deliver both immediate and future requirements for its clients. Microland leverages its comprehensive suite of proprietary platforms, integration expertise in third party tools and in-house developed consulting framework to deliver end-to-end automation solutions across the entire IT stack.

Chirajeet Sengupta, Partner, Information Technology Services at Everest Group said, "Microland has developed a credible suite of IT infrastructure services automation solutions that span across IT operations, workplace, cloud, analytics and reporting. Clients have praised Microland's proactiveness in pushing automation within existing contracts, high level of integration of solutions with existing client tools, and overall flexibility and agility showcased within implementation services offered."

The vendor analysis for Microland is available [here](#).

Sharad Heda, Head of Automation, Executive Leadership - Microland said, "We are excited to be a part of Everest Group's PEAK Matrix for Solutions. Microland partners with its customers to help them leverage Automation and Analytics as a strategic transformation lever for entire IT estate as against the tactical, script based, siloed approach that most companies still adopt. Every engagement that we undertake promises to deliver a concrete business outcome in this transformation journey."
