

SHAREPOINT

SCALABLE SHAREPOINT SERVICES FOR ENHANCED COLLABORATION

In today's business climate, SharePoint - one of the most flexible server applications - plays a pivotal role in allying collaboration initiatives with organizational goals. However,

creating a well-orchestrated SharePoint environment can be a challenge on account of its highly dynamic nature.

HOW WE HELP

Our SharePoint service offerings (see Figure 1) are designed to enable seamless collaboration and effective content management across business portals and sites. We deploy proven strategies of technology planning, implementation,

governance, upgrades, migration, and guidance to create a stable SharePoint ecosystem for you. Our phased approach strengthens your SharePoint environment to support additional workloads.

SharePoint Design and Deployment Services

Through a meticulous understanding and analysis of requirements, we efficiently cover the key aspects of (a) structure and design, (b) proof of concept, (c) deployment, (d) configuration and customization, (e) testing and, (f) deployment.

SharePoint Migration Service

We leverage proven methodologies and industry-recognized tools to smoothly migrate from legacy SharePoint / Third Party applications to the latest versions of SharePoint, and integrate business applications with 'zero data' loss.

SharePoint Managed Service

We manage your SharePoint server farm environment through simplified business processes, user adoption techniques, and meticulous governance. We provide SLA-backed managed services and support in all the key areas of Infrastructure Management, Application Management, Security Management, Service Management, and Backup Management.

SharePoint Training and Adoption Service

We ensure you have a high ROI on your SharePoint deployment by training your resources for easy adoption. Using versatile options of content and methodology, we customize our training for specific audiences (end users, IT Administrators, and business decision makers).
