

# ENTERPRISE MOBILITY MANAGEMENT

## NEXT-GENERATION MOBILITY SERVICES FOR 'ANYTIME ANYWHERE' USERS

Enterprise mobility is driving rapid business transformation. Today's mobile workforce demands 'anytime anywhere' access to data on personal devices, with desktops and secure corporate assets fast losing relevance. Mobile devices now provide businesses with global reach, reduce cycle times, enable flexible working hours, and improve productivity.

The proliferation of multi-platform mobile devices and emergence of Bring-Your-Own-Device (BYOD) have thrown new challenges in managing these devices, applications, and associated data while ensuring uncompromised security.

### HOW WE HELP

Our Enterprise Mobility Management services (see Figure 1) enable seamless navigation through the changing mobility

landscape by devising appropriate strategies for a consistent user experience across devices, while ensuring complete security.

Figure 1: Components of Microland's Enterprise Mobility Management Services

### WHAT YOU CAN EXPECT

Outcomes of our customized EMM services include:

- Complete mobility readiness assessment covering technology, people, policies, and processes
- Rapid EMM environment setup
- Wrapping and testing of enterprise mobile applications for multiple EMM products and solutions

## WHAT SETS US APART

Our differentiators in the mobility management space include:

### Proprietary Assets

smartEMRA	Framework to define the right EMM strategies and policies aligned to business goals.
smartEMaaS	Ready-to-deploy scalable architecture for EMM setup leveraging industry best practices and integrations with leading mobility products.
smartWRAP	Framework for periodic wrapping and testing of applications aligned to mobile OS release cycles.

### Global Partnerships

Alliances with leading technology providers (Citrix, VMware, etc.) to deliver customized solutions.
