

PROACTIVE VULNERABILITY MANAGEMENT - THE EFFECTIVE WAY TO SAFEGUARD YOUR SECURITY ENVIRONMENT

PROACTIVE VULNERABILITY MANAGEMENT – THE EFFECTIVE WAY TO SAFEGUARD YOUR SECURITY ENVIRONMENT

Enterprises today are embracing new technologies such as cloud, mobility, and the Internet of Things (IoT) to enhance agility and efficiency. To this end, it is imperative for organizations to proactively identify and mitigate vulnerabilities to safeguard enterprise data from breaches and threat.

Stringent compliance requirements also demand a secure, malware-free environment. You need an expert partner to provide complete visibility into your IT systems' vulnerabilities, how you can fix them, and to ensure compliance with standards.

HOW WE HELP

Our four-step approach to EVM comprises discovery, scanning, reporting, and remediation (see Figure 1).

Figure 1: Microland's Four-Step Approach to EVM

WHAT YOU CAN EXPECT

Our EVM services deliver the following outcomes:

High Precision

- Our highly customized, well-aligned, and configured vulnerability scanner accurately identifies vulnerabilities, eliminating the probability of false positives and negatives

Accelerated Response

- Our solutions integrate with your existing infrastructure management services to improve overall visibility, security, and compliance. Real-time trend analysis enables quick response to incidents and attacks

Assured Threat Elimination

- Our certified experts leverage a well-defined service management framework to efficiently mitigate risks

Rigorous Regulatory Compliance

- We achieve 100% compliance with standards through policy and compliance scanning, custom dashboards, trend reports, and expert advisories

WHAT SETS US APART

Backed by our vulnerability tracking portal **SecureSpace** and our service management platform **smartCenter**, our EVM delivery model is powered to provide agile identification, analysis, and mitigation with the following key differentiators:

Online Management Dashboard

Portal-based online dashboard provides granular insights in security, vulnerability, compliance, and actionable data

24/7 Customer Support

We provide 24/7 support through vendor coordination, periodic reviews, updates, leadership council support, reports, and dashboards

Proprietary smartCenter Platform

Our ITIL-based service management platform enables agile remediation of identified vulnerabilities through its effective workflow system
